

A better solution . . .

is as easy as 1, 2, 3

Patients: Print this form to give to your doctor. Ask your doctor to contact us so they are able to write your prescription for allergy drops using Embrace Pharmacy.

Your patient is requesting allergy drops: How to get started with sublingual immunotherapy in your practice:

1 Call All-American Allergy Alternatives, LLC at 1-877-NOSHOTZ:

We will ask you a few simple questions; then you will be on the road to integrating sublingual immunotherapy into your practice. We will send you an implementation kit that contains a sample treatment set of medication vials and all of the forms, teaching tools, and promotional supplies you will need to get started.

2 Test your patient for allergies:

You may test your patient for allergies by using either a skin or in vitro technique. If you do not already have a service provider, we are able to recommend several laboratories that offer in vitro options and/or skin testing supplies.

3 Send us your patient's prescription:

Upon receiving your patient's in vitro or skin test results, you will need to complete the prescription and payment forms that will be provided in the implementation kit. You may fax these forms to our pharmacy at 1-877-626-2702, or you may mail them to our address listed below.

Your patient's customized allergy drops will be prepared in a fully state-accredited pharmacy in accordance with the American Academy of Otolaryngic Allergy's (AAOA) recommended dosing schedule. Other customized treatment plans may also be formulated based on patient needs. This treatment set will be sent shortly upon receipt of order.

More than simply filling a prescription:

Other services we provide are:

- Marketing and promotional tools
- Consulting services
- Patient order history reports
- Auto-refill and auto-pay options
